PRINCIPAL CIVIL ENGINEER – This is the program manager-level in the Engineering series and serves under an employment agreement in an at-will FLSA Exempt capacity reporting to the Director of Engineering. Positions at this level are distinguished from other classes within the series by the critical and complex programs and functions they manage; level of responsibility assumed over programs and staff; independence of action taken; and by the nature of the public contact made. In addition to performing the most difficult and responsible duties assigned to classes within this series, incumbents will be expected to independently manage, control, develop and implement critical programs and functions for the department(s). Incumbents may supervise assigned administrative, technical, and professional staff. Employees at this level are required to be fully trained in all procedures related to assigned areas of responsibility.

Experience:

Ten years of responsible journey level experience.

Possession of a Grade D2 Water Distribution Operator Certification and possession of a Grade T1 Water Treatment Operator Certification issued by the State of California Water Resources Control Board may be required at the time of appointment. Failure to maintain such required certification may be cause for disciplinary action.
